

## New information

## Multiple locations

## Other costs

If we knew at the start what we know now, what would we have done different?

If your team is not all sitting at the same location, how often do you co-locate or rotate team

Who pays for project expenses (think of travel, licence and other costs)

## Travel

## Assumptions

## Tech change

If the project crosses borders, what is the plan with regards to traveling?

Are there any assumptions you made in the beginning which did not hold and what is the impact?

What technological aspect would you most like to change?

## Team change

## Customer

## Value creation

What in the team set up would you most like to change?

What is the most surprising thing you learned about the customer?

What is the most valuable thing we have done for the customer so far?
