

Design approval

Concept history

Reccommend

Are there any other parties in the customer organisation who have to approve the designs?

Do we know how we ended up with the current concept?

What practise from this project would you recommend every singe other project to adopt?

Twice as happy

Best thing

Learning

If we could have done things differently, what would have made the customer twice as happy?

What has been the best decision we have made since the start of the project?

If you had one week for somebody in the team to learn something. Who and what would that be?

crd-479

Waste

Availability

All parts

What has been the most wasteful activity so far?

What is the availability of the team members?

Are all parts, required to make the service work, budgeted for?

All mobile platforms, backend services, Gateways, CI systems,
