

Customer brand

First release

Dependencies

Do we have brand guidelines?

What is needs to be set up before we can deliver the first working software?

What are the external dependencies?

crd-176

crd-177

crd-178

Documentation

End2End

3rd Party libraries

What documentation is required?

What is needed to get a working E2E environment?

Are we free to choose frameworks, libraries etc.?

crd-179

crd-181

Dependencies

Repository

Legacy code

Can we influence the features of dependent services?

Where is the code?

What is the quality of the current codebase?

Can we modify/ add an api we are using?
