

Vision

Why

Project aim

What is the long-term vision of the service?

What is the reason the customer wants us to do the project?

What is the aim of the customer with this project?

Generally something like reduce costs, get more users, retain users, change business model...

Timeline

Timeline

Budget check

How much time is there reserved for bug fixing?

How much budget do we expect to be used before we deliver the first working version?

How often do we check how we are doing on budget?
